ATTENDANCE FO BORROWERS' MEETINGS 1943, 1944 AND 1945

Data below indicates 54% of FO borrowers in Region V attended 321 annual meetings held at the close of the 1945 crop year. This is a 1% increase in attendance over the 1944 record and 6% over 1943.

Florida increased attendance 7%, South Carolina 2%, Alabama 1% and Georgia had the same when compared with the 1944 record.

It is noted that the following districts had the highest percentage of attendance in the region: Alabama 4 - 81%, Alabama 2 - 79%, Georgia 3 - 77%. Districts having attendance from 31% to 38% were South Carolina 1 - 31%, Georgia 1 - 33%, South Carolina 3 - 37% and Georgia 2 - 38%.

A careful study of supervisors' reports on these meetings reveals that in counties having good attendance there is evidence that state, district and county personnel were concerned to the point that they did something on planning and preparing for the meeting throughout the year. The meeting was simply a continuation of proper supervision with families that culminated the year's business. It is further noted that programs of well attended meetings indicated evidence of some ingenuity and creative thinking on the part of district and county supervisors. In the better attended counties supervisors contacted advised that borrowers' meetings have contributed to improving the plight of FO borrowers. Participation by the borrowers in planning and holding the meetings accounts for much of the success. The reverse is apparent in counties having less than 40% attendance. Contacts in counties with low attendance since the meeting show a pessimistic and defeatist attitude so far as meetings are concerned. In view of the above facts it appears that time is lost in meetings where less than 50% of FO borrowers attend.
